Cepheo Payment Connector

Stay up to date on new payment types and use your resources and budgets elsewhere

MobilePay, Apple Pay, Google Wallet, Vipps, Klarna… new payment options seem to appear every few months. With Cepheo Payment Connector, your business can stay up to date with the newest payment methods without the need for endless rounds of implementations and updates. Just implement once and Cepheo will provide regular updates to ensure that your payment solution is always current and supporting your business and your customers.

Keep your tills running smoothly, even when your validation gateway is offline

Cepheo Payment Connector is a tried-and-tested solution with stable and robust operation. It keeps tills open and customers moving even when your validation gateway is offline by creating a buffer of transactions until normal service is restored.

Support the most common payment and transaction types

The solution supports the most common payment types – including mobile and contactless card payments – and common transaction types such as purchases, refunds, cancellations, authorizations and gift cards. It also offers integration with Storebox.

Your choice of hardware – works with most POS terminals

Cepheo Payment Connector works with the most frequently used and market-leading POS terminals, so there is no need to invest in new hardware unless you want to. The list of compatible solutions is updated regularly as new options become available.

Advantages

- A single package, that is updated regularly with new payment types

- Integration with most market-leading POS terminals

- Your tills keep running even if your validation gateway is down

- A low, predictable monthly payment with no surprises

- Free up budget and resources for other priorities

- Reliable, skilled support and fast response time
